

KM Enterprises Files Suit Against Global Traffic Technologies

November 5, 2010 — KM Enterprises, Inc. filed a Complaint today against Global Traffic Technologies, LLC (“GTT”) in United States District Court for the District of Minnesota. The Complaint seeks a declaratory judgment that GTT’s United States Patent No. 5,539,398 is invalid and not infringed by KM Enterprises’ Emtrac Priority Management System. Last month, GTT incorrectly asserted the ’398 Patent against a non-existent corporation, Emtrac Systems, Inc., as well as the President of KM Enterprises, Kris Morgan, and his two sons, who are neither officers nor shareholders of KM Enterprises. To combat the confusion in the marketplace caused by GTT’s misdirected lawsuit, KM Enterprises filed today’s Complaint. KM Enterprises asserts in its Complaint that GTT’s ’398 Patent is invalid and does not reach KM Enterprises’ products. KM Enterprises also seeks damages and an injunction against GTT for the false advertising of its products, for interfering with prospective contractual relations and for deceptive trade practices.

About KM Enterprises, Inc.

Headquartered in Mt. Vernon, Illinois, KM Enterprises, Inc. produces and sells the Emtrac Priority Management System—a system that uses precise navigation technology and secure RF communication to detect equipped transit, emergency, and municipal vehicles to place priority or preemption requests to intersection signal-control equipment. KM Enterprises, Inc.’s Emtrac System is the leading GPS-based priority and preemption system in the industry.
